Disclosure: The basic reasons behind the dismal Sales Revenue along with other financial indicators are as follows:

The uncovered and pragmatic reason of financial data of the company went up due to deterioration on account of market impact among the customers and stakeholders due to the proposed sponsor shares transfer of the company which has been terminated on December 2023. That's created a negative perception in its sales revenue during this tenure. Consequently, production capacity went downturn but financial liabilities servicing charge and fixed overhead of the company were remained unchanged which was overtly helped the financial performance meagerly. The management and newly constituted board believe that business performance will increase gradually in the coming days.

By order of the Board of Directors
